

CONNECTICUT HIGHER EDUCATION TRUST PERFORMANCE TABLES

The performance tables below show each Age Band's and Investment Option's returns over the specified time period. Performance is calculated from the day on which funds were first invested in an Age Band or Investment Option after it was made available (the "Inception Date"). With the exception of the Principal Plus Interest Option, which invests in a Funding Agreement issued by TIAA-CREF Life Insurance Company ("TIAA-CREF Life"), all of the Investment Options invest in Institutional Class shares of certain TIAA-CREF Institutional Mutual Funds (individually and collectively referred to below as the "underlying mutual fund(s)").

The performance data quoted represent past performance and are net of all fees and expenses, including the estimated expense ratio of the underlying mutual funds and the Plan Manager Fee. Past performance is not a guarantee of future results. Your returns and the principal value of your Account will fluctuate so your investment may be worth more or less than the original value when you withdraw your money. Current performance may be lower or higher than the performance quoted above.

¹ All performance figures in the table, with the exception of the performance figures in the Year-to-Date column, represent the average annual compound rate of total return. All figures in the Year-to-Date column represent cumulative, non-annualized returns.

² These Age Bands have limited operating histories, so the returns cited above may not be a good indication of how they may perform over a longer time period. Beneficiaries are moved from one Age Band to the next Age Band on the first "rolling date" following their fourth, eighth, twelfth, fifteenth and eighteenth birthdays. The "rolling dates" are March 20, June 20, September 20 and December 20 (or the first business day thereafter).

³ The Blended Indexes are customized benchmarks that combine the fund benchmarks of each underlying mutual fund held in an Age Band according to the Age Band's asset allocation during the relevant time period. The Blended Indexes are used to compare the performance of the corresponding Age Band. They are unmanaged and do not reflect the deduction of any fees or expenses.

⁴ For each Age Band, the estimated annual expense ratio is based on a weighted average of each underlying mutual fund's expense ratio as of February 1, 2010 (the "Estimated Underlying Fund Expenses") in accordance with the Age Band's asset allocation among the underlying mutual funds.

⁵ For its services as Program Manager, each Age Band pays TFI an annual management fee of between 0.41% and 0.51% (depending on the Age Band) of the average daily net assets held by that Age Band (the "Program Manager Fee"). For any Age Band, if the corresponding estimated annual expense ratio increases, the Program Manager Fee for such Age Band will decrease so that the sum of the estimated annual expense ratio, the State Fee of 0.01%, and the Program Manager Fee does not exceed 0.65%.

⁶ Each Investment Option (with the exception of the Principal Plus Interest Option) pays to the Trustee a State Fee equal to 0.01% of the average daily net assets of the Trust to pay for expenses related to oversight of the Trust.

³ These Investment Options have limited operating histories, so the returns cited above may not be a good indication of how they may perform over a longer time period.

⁴ The Principal Plus Interest Option does not pay the Program Manager Fee and it is not invested in mutual funds so there is no estimated annual expense ratio for this option.

⁵ The estimated annual expense ratio for each Investment Option (other than the Principal Plus Interest Option) is based on a weighted average of each underlying mutual fund's expense ratio as of February 1, 2010 (the "Estimated Underlying Fund Expenses") in accordance with the Investment Option's (other than the Principal Plus Interest Option) asset allocation among the underlying mutual funds.

⁶ For its services as Program Manager, each Investment Option (other than the Principal Plus Interest Option) pays TFI an annual management fee of between 0.315% and 0.56% (the "Program Manager Fee"). If the estimated annual expense ratio for any Investment Option (other than the Principal Plus Interest Option) increases, the Program Manager Fee will decrease so that the sum of the estimated annual expense ratio, the State Fee of 0.01%, and the Program Manager Fee does not exceed 0.65%.

⁷ Each Investment Option (with the exception of the Principal Plus Interest Option) pays to the Trustee a State Fee equal to 0.01% of the average daily net assets of the Trust to pay for expenses related to oversight of the Trust.
